ANKUR KOHLI - PORTFOLIO Genoa, Italy Indian

SOFTWARE ENGINEER | FULL-STACK & AI/GENAI

PROFESSIONAL SUMMARY

Software Engineer experienced in designing and developing scalable software systems across frontend and backend environments for the Italian MediaTech industry, Japanese clients, and other international engagements. Experience spans backend services, API driven and real time applications, distributed systems, and the integration of AI and LLM capabilities into software products. Contribute across system design, implementation, integration, testing, deployment, and optimization, with an emphasis on performance, maintainability, and sound software architecture.

PROFESSIONAL EXPERIENCE

▸ **Freelance Software Engineer & Consultant** *December 2025 - Present*

GINI Technologies US, Remote

- Develop software solutions across frontend and backend layers for international client engagements, translating business requirements into maintainable implementations.
- Build application services that incorporate LLM capabilities for classification, summarization, document retrieval, and automated response generation.
- Design application integrations and business workflows, connecting software components with external services and reducing manual processing.
- Contribute across system design, implementation, testing, deployment, and maintenance while working directly with international stakeholders.

▸ **Software Engineer** *April 2025 - October 2025*

NTT DATA Italia Italy

- Developed software for frontend and backend components for enterprise MediaTech solutions in the Italian market, working within multithreaded and distributed system architectures.
- Designed and integrated communication components for low latency data exchange between system modules in real time applications.
- Led the deployment of an autonomous navigation system for an international client, from technology assessment through physical robot validation, translating research requirements into a repeatable operational workflow.
- Designed and implemented a GitLab CI/CD framework covering integration testing, regression checks, and runtime verification, standardizing release processes across the team.

▸ **Software Engineering Thesis Project** *June 2023 - February 2024*

NTT DATA Italia Italy

- Designed a ROS2 based software architecture for autonomous quadrupedal and mobile robots, integrating perception, localization, mapping, and navigation components.
- Developed Dockerized SLAM and navigation environments using ROS2, supporting reproducible development and experimentation.
- Implemented autonomous exploration and navigation workflows using SLAM, localization, path planning, and navigation algorithms.
- Evaluated robot behavior in simulation and on physical platforms, identifying navigation and integration issues, and refining the system through iterative testing.

PROFESSIONAL SKILLS

TECHNICAL SKILLS

Programming Languages:
Python, C/C++, Java, Dart, JavaScript

Frontend Technologies:
HTML5, CSS3, ReactJS, Bootstrap, Tailwind CSS

AI, GenAI & LLM:
LLMs, RAG, Gemini/OpenAI API

Backend & Distributed Systems:
Spring Boot, Spring MVC, REST APIs, WebSocket Services, JSON, SQL (MySQL)

Software & Tools:
Ubuntu/Linux, Docker, Git/GitLab, Flutter, CI/CD Pipelines, VS Code

SOFT SKILLS

Leadership & Planning:
Strategic Planner, Project Management, Agile Delivery, Stakeholder Communication

Innovation & Problem Solving:
Structured Problem Analysis, Technology Assessment, Change Management Support

Teamwork & Collaboration:
Reliable, Organized, Cross functional Collaboration

CERTIFICATIONS

- **Hugging Face:** Fundamentals of Agents — *October 2026*
- **Anthropic:** Model Context Protocol: Advanced Topics — *September 2026*
- **OpenAI:** Apply AI at Work Pathway Completion — *September 2026*
- **Anthropic:** AI Fluency: Framework & Foundations — *August 2026*
- **Anthropic:** Claude Platform 101 — *August 2026*
- **Microsoft:** Github Copilot Fundamentals — *July 2026*
- **Google Cloud:** Prompt Design in Vertex AI — *February 2026*
- **Microsoft:** Azure Fundamentals — *November 2025*
- **Google Cloud:** Introduction to Large Language Models — *January 2025*
- **Google Cloud:** Introduction to Generative AI — *October 2024*

EDUCATION

- **M.Sc Computer Engineering (Specialization: Robotics Engineering)** — *September 2021 - March 2024*
  University of Genoa — Italy
- **B.Tech Mechatronics Engineering** — *July 2016 - June 2020*
  University of Petroleum & Energy Studies — India

PROJECTS

- **Software Development Portfolio**
  - **Research Assistant Pro | Full-Stack Chrome Extension & Reactive AI Backend:** Built a Chrome extension with a Spring Boot backend and the Gemini API for summarization, Q&A, notes, and referencing. [GitHub]
  - **ResumeAI: Next-Gen Career Intelligence Platform:** Designed a cost effective AI resume analyzer using React.js, Tailwind CSS, and Puter.js for JD matching, ATS insights, skill gap analysis, and improvement suggestions. [GitHub]
- **Artificial Intelligence Portfolio**
  - **Automated Warehouse Scenario Using PDDL 2.1:** AI planning system using PDDL 2.1, priority queues, and plan graphs to optimize order management, storage allocation, and logistics flow. [GitHub]
  - **Task and Motion Planning for Robotics in Coffee Shop Scenario:** Integrated task and motion planning for robotic navigation using PDDL, state space graphs, BFS, heuristic search, and Euclidean distance. [GitHub]
- **Robotics Portfolio**
  - **Software Architecture for Mobile Robot Control:** ROS based robot controller using Dijkstra's algorithm for graph based routing and autonomous path planning in Python. [GitHub]

LANGUAGE

- **Italian:** Functional Proficiency
- **English:** Proficient
