ANKUR KOHLI - PORTFOLIO | Genoa, Italy

Software Engineer with expertise in Python, C/C++, JavaScript, ReactJS, Dart, Flutter, Spring Boot, Java, Tailwind CSS & API driven distributed systems, Tech-oriented.

ABOUT ME

Software Engineer with experience building production grade systems across frontend and backend for an Italian MediaTech industry. Specialized in scalable, API driven architectures with real time capabilities, including the integration of AI and GenAI/LLM solutions. Focused on performance, clean design principles, and maintainable code. Proven ability to collaborate in cross functional teams and contribute across the full development lifecycle, delivering reliable, high quality software.

PROFESSIONAL EXPERIENCE

• Software Engineer

NTT DATA Italia

April 2025 - October 2025

Italy

- Developed and managed cross platform application with a responsive frontend and realtime, multithreaded backends, enabling secure low latency communication across distributed components.
- Led the development and deployment of an autonomous NAV2 SLAM system, implementing automated workflows that were tested on a physical robot and enabled consistent deployment across environments.
- Implemented structured testing, validation, and debugging pipelines using GitLab CI/CD to ensure reliable integration and consistent runtime behavior.
- Contributed to system architecture, technical documentation, and agile collaboration, translating research driven concepts into production ready systems.

• Software Engineering Thesis Project

NTT DATA Italia

June 2023 - February 2024

Italy

- Designed and optimized real time multithreaded robotic architectures for efficient coordination.
- Built containerized ROS2 SLAM pipelines for mapping and navigation with consistent deployments.
- Integrated automated testing and CI/CD workflows to ensure continuous validation and system stability.
- Produced technical documentation to support maintainability, scalability, and team collaboration.

PROFESSIONAL SKILLS

TECHNICAL SKILLS

Programming Languages:

Python, C/C++, Java, Dart, JavaScript

Frontend Technologies:

HTML5, CSS3, ReactJS, Bootstrap, Tailwind CSS

GenAI & LLM Engineering:

LLM, RAG, LlamaIndex

Backend & APIs:

JSON, WebSocket Services, REST, RESTful, SQL (MySQL), Spring Boot

Software & Tools:

Ubuntu/Linux, Docker, Git/GitLab, Flutter, CI/CD Pipelines, VS Code

SOFT SKILLS

Leadership & Planning:

Strategic Planner, Project Management, Mentoring

Innovation & Problem Solving:

Creative Spirit, Concept Development

Teamwork & Collaboration:

Conflict Resolution, Reliable, Organized

CERTIFICATIONS

- **Google Cloud:** [Derive Insights from BigQuery Data](#) April 2026
- **Google Cloud:** [Prompt Design in Vertex AI](#) February 2026
- **Microsoft:** [Azure Fundamentals](#) November 2025
- **Google Cloud:** [Responsible AI: Applying AI Principles with Google Cloud](#) January 2025
- **Google Cloud:** [Introduction to Large Language Models](#) January 2025
- **Google Cloud:** [Introduction to Responsible AI](#) January 2025
- **Google Cloud:** [Innovating with Google Cloud AI](#) December 2024
- **Google Cloud:** [Introduction to Generative AI](#) October 2024
- **Amazon Web Services (AWS):** [Introduction to Machine Learning: Art of the Possible](#) September 2024

EDUCATION

- **M.Sc Computer Engineering (Specialization: Robotics Engineering)** September 2021 - March 2024
University of Genoa Italy
 - GPA: 100/110
- **B.Tech Mechatronics Engineering** July 2016 - June 2020
University of Petroleum & Energy Studies India

PROJECTS

- **Software Development Portfolio**
 - **Research Assistant Pro | Full-Stack Chrome Extension & Reactive AI Backend:** Developed a Chrome extension for content summarization, Q&A, citations, note-taking, and bookmarking using Spring Boot and the Gemini API. [🔗]
 - **ResumeAI: Next-Gen Career Intelligence Platform:** Designed and developed a cost effective, AI assisted resume analyzer using React.js, Tailwind CSS, and Puter.js, providing semantic resume JD matching, ATS focused insights, skill gap analysis, and GenAI driven improvement suggestions. [🔗]
 - **SkyScope Live Weather Dashboard with API Integration:** Built a real time weather application with live forecasts, dynamic UI updates, and WeatherAPI integration using JavaScript and Bootstrap. [🔗]
- **Artificial Intelligence Portfolio**
 - **Automated Warehouse Scenario Using PDDL 2.1:** AI system optimizing warehouse orders, storage, and logistics using planning, priority queues, plan graphs, and real-time analytics. [🔗]
 - **Task and Motion Planning for Robotics in Coffee Shop Scenario:** Integrate task and motion planning for robotic navigation using PDDL, state-space graphs, BFS, heuristic search, and Euclidean distance. [🔗]
- **Machine Learning Portfolio**
 - **Cervical Cancer Detection using CNN and the VGG16 Module - TensorFlow:** The objective is to deploy a VGG16 based deep learning model in TensorFlow to detect cervical cancer. [🔗]
 - **Convolutional Neural Networks (CNNs) to Process an Image - PyTorch:** The goal is to implement CNNs in Jupyter/Python using PyTorch for efficient image processing and deep learning based analysis. [🔗]
- **Robotics Portfolio**
 - **Software Architecture for Mobile Robot Control:** This project involves controlling a ROS based mobile robot using graph based routing with Dijkstra’s algorithm in Python. [🔗]

LANGUAGE

- **English:** Proficient
- **Italian:** Limited working proficiency
