👤 **ANKUR KOHLI - PORTFOLIO** 📍 Genoa, Italy

Software Engineer with expertise in Python, C/C++, JavaScript, ReactJS, Dart, Flutter, SpringBoot, Java, Tailwind CSS & API driven distributed systems, Tech oriented.

ABOUT ME

Software Engineer with experience building production grade systems across frontend and backend for the Italian MediaTech industry and international clients. Specialized in scalable, API driven architectures with real time capabilities, including the integration of AI and GenAI/LLM solutions. Focused on performance, clean design principles, and maintainable code. Proven ability to collaborate in cross functional teams and contribute across the full development lifecycle, delivering reliable, high quality software.

PROFESSIONAL EXPERIENCE

► Freelance Software Engineer

December 2025 - Present

GINI Technologies

US, Remote

- Developed AI enabled software solutions using modern technologies to support intelligent automation and data driven workflows across client projects.
- Built and maintained secure backend services, integrating LLM capabilities into client facing workflows to support automated responses.
- Advised on technical architecture and integration strategy as a consultant, translating client requirements into development plans.
- Delivered production ready solutions aligned with client requirements, ensuring smooth integration and consistent quality across deliverables.

► Software Engineer

April 2025 - October 2025

NTT DATA Italia

Italy

- Architected a scalable distributed system with a real time multithreaded backend, enabling secure low latency communication across enterprise components in a production MediaTech environment.
- Led end-to-end deployment of an autonomous navigation system from technology assessment to physical validation, delivering a fully repeatable production pipeline.
- Designed and implemented a GitLab CI/CD framework covering integration testing, regression checks, and runtime verification, standardizing release governance across the team.
- Transformed research driven requirements into production ready solutions in an agile client engagement, contributing to architecture design and technical documentation.

► Software Engineering Thesis Project

June 2023 - February 2024

NTT DATA Italia

Italy

- Designed and optimized real-time, multithreaded robotic architectures to improve coordination across distributed system components.
- Built containerized ROS2 SLAM pipelines for mapping and navigation, ensuring consistent and repeatable deployments across test environments.
- Integrated automated testing and CI/CD workflows using GitLab, enabling continuous validation, early issue detection, and improved system stability.
- Produced comprehensive technical documentation covering system architecture and workflows, supporting maintainability, scalability, and effective cross-team collaboration.

PROFESSIONAL SKILLS

TECHNICAL SKILLS

Programming Languages:
Python, C/C++, Java, Dart, JavaScript

Frontend Technologies:
HTML5, CSS3, ReactJS, Bootstrap, Tailwind CSS

GenAI & LLM Engineering:
LLM, RAG, LlamaIndex

Backend & APIs:
JSON, WebSocket Services, REST, RESTful, SQL (MySQL), Spring Boot

Software & Tools:
Ubuntu/Linux, Docker, Git/GitLab, Flutter, CI/CD Pipelines, VS Code, IntelliJ IDEA

SOFT SKILLS

Leadership & Planning:
Strategic Planner, Project Management, Agile Delivery, Stakeholder Communication

Innovation & Problem Solving:
Structured Problem Analysis, Technology Assessment, Change Management Support

Teamwork & Collaboration:
Reliable, Organized, Cross functional Collaboration

CERTIFICATIONS

▶ Google Cloud: Derive Insights from BigQuery Data	April 2026
▶ Google Cloud: Prompt Design in Vertex AI	February 2026
▶ Microsoft: Azure Fundamentals	November 2025
▶ Google Cloud: Responsible AI: Applying AI Principles with Google Cloud	January 2025
▶ Google Cloud: Introduction to Large Language Models	January 2025
▶ Google Cloud: Introduction to Generative AI	October 2024
▶ Amazon Web Services (AWS): Introduction to Machine Learning: Art of the Possible	September 2024

EDUCATION

▶ M.Sc Computer Engineering (Specialization: Robotics Engineering) <i>University of Genoa</i>	September 2021 - March 2024 Italy
▶ B.Tech Mechatronics Engineering <i>University of Petroleum & Energy Studies</i>	July 2016 - June 2020 India

PROJECTS

- ▶ **Software Development Portfolio**
 - **Research Assistant Pro | Full-Stack Chrome Extension & Reactive AI Backend:** Built a Chrome extension with a Spring Boot backend and the Gemini API for summarization, Q&A, notes, and referencing. [🔗]
 - **ResumeAI: Next-Gen Career Intelligence Platform:** Designed a cost effective AI resume analyzer using React.js, Tailwind CSS, and Puter.js for JD matching, ATS insights, skill gap analysis, and improvement suggestions. [🔗]
- ▶ **Artificial Intelligence Portfolio**
 - **Automated Warehouse Scenario Using PDDL 2.1:** AI planning system using PDDL 2.1, priority queues, and plan graphs to optimize order management, storage allocation, and logistics flow. [🔗]
 - **Task and Motion Planning for Robotics in Coffee Shop Scenario:** Integrated task and motion planning for robotic navigation using PDDL, state space graphs, BFS, heuristic search, and Euclidean distance. [🔗]
- ▶ **Robotics Portfolio**
 - **Software Architecture for Mobile Robot Control:** ROS based robot controller using Dijkstra’s algorithm for graph based routing and autonomous path planning in Python. [🔗]

LANGUAGE

- **Italian:** Functional Proficiency
- **English:** Proficient
